## **Letter of Intent**

### **EUSTAR – European Society of Hypertension Telemedicine in Arterial Hypertension Register**

As part of the project EUSTAR a telemedical register is to be set up for patients with hypertension. An important goal of the register is to obtain a better understanding of effects, side effects, quality and costs of different therapy options for hypertension patients and to optimize the treatment using telemedicine applications.

The AOK Niedersachsen supports the goals of the register and the content of the EUSTAR project application as part of the EU program "Horizon 2020 PHC-25-2015: Advanced ICT-systems and services for integrated care". Therefore we express interest to cooperate in data analysis with regard to epidemiologically relevant research questions.

Dr. Sveja Eberhard
